

BATTERY WATERING TECHNOLOGIES

FLOW METER MOUNT

This watering cart combines the Aqua Sub XTREME™ and the Flow Meter for an exceptional watering experience.

FLOW METER

Provides real-time data of the amount of water you are putting into each battery at each watering cycle.

DIRECT FILL LINK

Smaller, more robust, and less cumbersome to handle than traditional watering guns. The ergonomic streamlined design makes it comfortable to use.

FLOW MOUNT

With the Flow Meter resting inside the Flow Mount, it is protected from the rough handling that can occur in industrial watering.

RETROFIT

A Flow Mount can be retrofitted onto a previously purchased Aqua Sub Xtreme™ cart.

AQUA SUB XTREME™

This AC/DC powered watering cart is powered by a 12-volt battery (included) with its own on-board charger. The battery's state of charge is indicated by LED lights and the pump will automatically shut off if the battery is low. AC power can be used to either power the cart or charge the battery. The translucent tank allows monitoring of the water level while in use.

The Flow Meter is mounted upright towards the user for easy to read data.
